## Education

**Shankara Group of Institution - Rajasthan University**  
Bachelor's in Computer Applications(BCA)

Sept 2022– July 2025  
Jaipur,Rajasthan

## Work Experience

### Web Developer Intern – Zoom Enterprises (Sep 2024 – Nov 2024)

- Developed and optimized MERN stack-based web applications, improving performance and scalability.
- Built dynamic and responsive UI using React.js and Tailwind CSS, enhancing user experience.
- Integrated RESTful APIs with Node.js and Express.js, ensuring efficient data flow and backend functionality.

### App Developer Intern – Zoom Enterprises (Dec 2024 – Feb 2025)

- Built React Native applications using TypeScript, ensuring type safety and maintainability.
- Designed and implemented feature-rich, cross-platform mobile apps, improving performance and user engagement.
- Integrated third-party APIs and Firebase services, enhancing app functionality and real-time capabilities.

## Projects

### Futurix Coaching App – AI-Powered Learning Platform

- AI-Driven Course Generation & Interactive Learning – Automatically creates structured courses with chapters, MCQs, flashcards, and a Q&A section based on user-selected topics, enhancing comprehension through AI-generated learning tools.
- Seamless & Engaging User Experience – Built with React Native and Tailwind CSS for a smooth, intuitive mobile interface, ensuring an efficient and interactive learning journey.
- Scalable & AI-Powered Backend – Utilizes Google Firebase for secure authentication, real-time data management, and hosting, while leveraging Google Gemini AI for dynamic content generation.

### Food Delivery App – MERN Stack-Based Ordering Platform

- Seamless Food Ordering – Users can browse food items, place orders, and make secure payments via Stripe.
- Real-Time Order Tracking – Enables users to track their order status and view order history for a smooth experience.
- Powerful Admin Dashboard – Admins can add, delete, and manage products while efficiently tracking customer orders.
- Secure & Scalable Architecture – Built with MERN Stack, using JWT Authentication for secure user access

### AI Image Generator App – MERN Stack-Based AI-Powered Image Creation

- AI-Powered Text-to-Image Generation – Users can generate unique images instantly by entering a text prompt.
- Secure User Authentication – Implements JWT-based authentication for secure login and access control.
- Personalized Image Gallery – Users can view, save, and manage their generated images efficiently.

## Technical Skills

<b>Languages:</b>	JavaScript, TypeScript, Python, PHP, SQL,
<b>Framework &amp; Library:</b>	Nextjs, React Native, React, NodeJs, ExpressJs, Redux Toolkit, JQuery , Mongoose
<b>Databases:</b>	MongoDB, MySQL
<b>Styling &amp; UI:</b>	Tailwind, Bootstrap, ShadCN, DailsyUI
<b>Deployment:</b>	Vercel, Netlify, Render, Heroku
<b>Version Control:</b>	Git & Github

## Achievements

- Solved 160+ DSA problems on LeetCode, strengthening problem-solving and algorithmic thinking skills.
- Earned JavaScript & DSA certifications from HackerRank, showcasing expertise in coding and data structures.
- Participated in Shankara Global Hackathon 2025, collaborating on innovative solutions in a competitive environment.
